## It's Not Very Exciting Usually, but Electoral College Game is Big Event

By CHARLES NORMAN  
Associated Press Writer  
NEW YORK—The college of electors do an average of 100 times a year a famous institution.

That's because when the 531 electors of the United States meet in the electoral college, they are not only electing a president, but also electing a vice president.

It is the only time in the history of the United States that the electors meet in person. They meet in the state capitals of each state, and in the District of Columbia.

On the first Monday after the second Wednesday in December, the electors meet in the state capitals of each state, and in the District of Columbia. They meet in the state capitals of each state, and in the District of Columbia.

## Why Double Liability On Bank Stock Should Go

The Ohio Constitution now provides for double liability on state bank stock. This means that a stockholder is liable for a cash payment equal to the par value of his stock in case the bank should close.

The Federal law had a similar provision for National banks but it has been removed by Congress effective July 1, 1937. Twenty-two states now are in agreement with the Federal Government in this respect.

Double Liability, so called, has been deceptive in that it has produced in many years less than five cents on the dollar for depositors throughout the state when it was called upon.

Every depositor is insured at all times up to \$5,000.00 resulting in more than 99 per cent of all deposits in Ohio Banks being fully covered by Federal Deposit Insurance paid for by the banks themselves. All the banks in Marion County are members of the Federal Deposit Insurance Corporation.

Among the requirements of its member banks by the Federal Deposit Insurance Corporation is one requiring a certain amount of Capital to total deposits knowing that additional Capital by the banks means additional protection for the depositors.

Due to growing deposits and other conditions many state banks desire to add to their Capital by issuing new stock but it is impossible to sell bank stock because double liability has a tendency to discourage the investment in bank stock by responsible and capable persons.

Substitution of increased capital for double liability would mean stronger and more certain protection for depositors in the event of trouble.

By elimination of double liability state banks would be on the same capital basis as National banks which means a uniform banking system throughout Ohio.

The elimination of double liability would not affect any depositor or stockholder in a financial institution now closed.

The elimination of double liability has the endorsement of the present and all past Ohio State Bank superintendents, also the endorsement of Leo T. Crowley, Chairman of the Federal Deposit Insurance Corporation.

All the banks of Marion County in the interest of sound and uniform banking throughout Ohio and of the increased protection of depositors urge the voters of Marion County to VOTE YES on the proposed amendment.

## TAX ON PAYROLLS CAUSES VOTE SHIFT

Continued from Page Six

may upset all polls of votes that have been made. It may assure New York state for Landon and some of the middle western states as well. For it tells in a single concrete measure the whole philosophy of new deal policy of experimentation in disregard of constitutional safeguards.

Even the "New York Times" which announced recently its support of President Roosevelt for re-election had this to say editorially yesterday of the social security payroll tax.

Perhaps its greatest single defect and danger is the provision it makes for building up a colossal reserve fund which is expected ultimately to reach \$50,000,000,000—far in excess of the present total national debt. Experts believe a reserve of this sort is potentially dangerous and wholly unnecessary.

Another defect of the law in the opinion of some authorities is the postponement of benefit payments. After five years, for example, it will be taking in each year 16 times as much as it is paying out. At the end of 10 years, it will be taking in five times as much as it is paying out. This suggests that the workers will in time resent having the taxes deducted from their income while they see so little being paid out and a huge and untouched reserve fund growing ever larger.

But more important still in my opinion is what kind of investment will the federal government make with its reserve fund? It will be compelled by law to invest in government bonds which means that the creation of national debt for public works and boot-dogging will be constantly encouraged till the point where the citizen will wonder whether the reserve fund can ever be paid off except by printing press money and an inflation that will make the price of goods rise so high that the price of a loaf of bread will be as much as a dollar.

The payroll tax controversy has come into the law was passed in August 1935. The Republicans have been a help at the switch. They had the ingredient of a first class issue and never used it. The employees facing the payroll cut reaction have been the protesters, and the taxpayers. But the cat is out of the bag now and irrespective of who is held at work the issue has come to the forefront of attention as the most pressing problem that the country is at work will have to decide in January 1937.

# The Myth About Men & Machines!

**L**OOK at your shoes. They are neat, comfortable... and not too costly. They were made by machine. They give service to you... and employment to scores of people who made and brought them to you. These include the salesman, the owner of the shoe store, the truckman who delivered them, all the men who, step by step, made them. You can figure out yourself how long is that list of people.

More shoes for more people... and at lower prices. Instead of one pair a day, the machine turns out dozens... and because the cost is lower, more people can buy.

## Facts Don't Fool

Some people say that the machine causes unemployment. That it does the work that men should be doing. But what is the truth about you and the machine?

Facts don't fool. So let's talk facts:

**One—Machines increase the number of jobs.**

**Two—Machines increase real wages... that is, they make it possible for the average man to buy more things and better things for his salary or wages.**

**Three—Machines shorten working hours, provide more leisure.**

**Four—Machines bring more things to more people... providing the comforts, conveniences and luxuries that make up our American standard of living.**

These are the facts. Now let's prove them:

## Machines Increase the Number of Jobs

From 1890 to 1930, the period of the greatest machine development, the population of the United States increased 218 per cent. But jobs increased 291 per cent. In recent years 18 new industries have given jobs to 10,000,000 people. You can name them yourself... automobiles, electrical products, rubber tires, gasoline, rayon and many others.

Ten years from now someone you know may make a fortune from an idea that today is in the back of his head. It will become a reality. Be patented. Then a machine will make it. And you and I will either want it... or get a job making it. A new industry will arise. All from a machine.

## Machines Increase Real Wages

Real wages have increased more than 60 per cent in the past 60 years... the machine age. That is, the average worker can buy more than half again as much as he could in 1870.

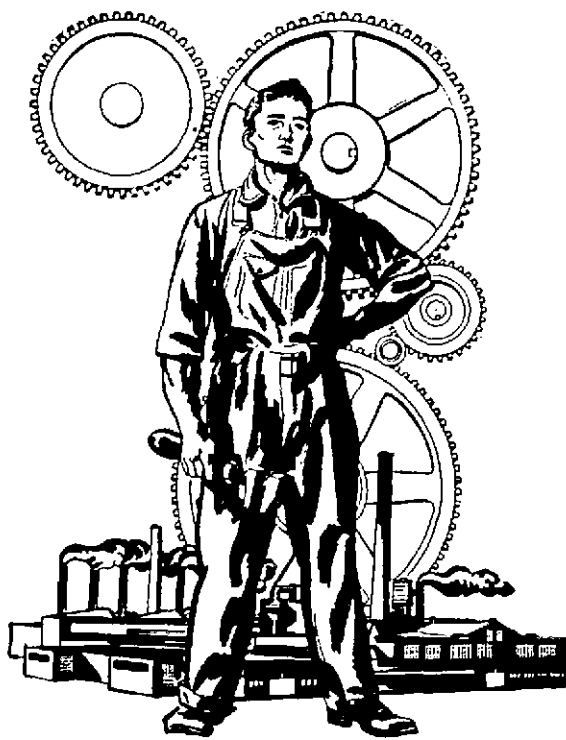

Look at automobile tires for example. Back in 1910 the average tire cost \$25. It did well to last 2,500 miles. But new machines brought the average tire cost down to \$12. And it will run 25,000 or more miles.

In the meanwhile, average wages of industrial workers were increasing. In 1910, an hour's labor would buy 23 miles of tire travel. But today, an hour's labor will buy 1,220 miles of tire travel—about forty times as much as in 1910.

## Machines Shorten Working Hours... Raise the Standard of Living

The period of the greatest machine development has seen a decline in the hours of work in manufacturing from an average of 60 per week in 1890 to 48 or under now.

Machines have brought within reach of everybody a variety of comforts, conveniences and luxuries undreamed of 50 years ago... automobiles, electric lights, telephones, radios and a hundred other things we could not do without.

made by the automobile. Three times as many new jobs as the old ones.

And let's look at some other "job-eater-uppers." The typewriter and the adding machine. Here are two machines that certainly let one office worker do the work of at least two or three working by hand.

In 1860 with no office machines, it took 4,369 clerks, bookkeepers, and so on for every million of population. Now bring on the machines. Fewer jobs? Nothing of the sort. By 1930 office workers had increased to 49,805 per million population... just 11 times as many as before they started doing their work by machine.

## Always Multiply Wealth

What does all this prove?

One thing. MACHINES MAKE JOBS!

There is a throttled demand in America today for nearly \$19,000,000,000 worth of new machinery—enough to keep four million men steadily at work for two years.

The machine age in America has taught us one simple economic rule. Real wealth comes from producing more goods so more people can have a bigger share. That is the American formula—always multiply wealth. That formula calls for the installation of new machines to develop new products... new machines to stimulate production... new machines to make new jobs.

In every advance in machinery, in every new machine, you gain greater freedom, greater ease... a better living. You rise to the heights with the machine.

If you are interested in this subject, learn more about it. A free copy of a comprehensive booklet "Men & Machines" now being prepared, will be sent you. Write to Room 2036, 11 West 42nd Street, New York City.

But what happens to an old industry when one of these new industries comes in? Let's look at the facts again. Take the horse and buggy business. 1900 was the top year for jobs in it. Just about a million people were working as drivers, stable hands, wagon makers, and so on.

Compare those million jobs with the three million new jobs

No date has been definitely set for the dance, the proceeds of which are used each year to assist in carrying on the board's work at the city hospital.

Tentative plans for the event were discussed at a meeting of the board yesterday at the home of Mrs. Clifford M. Howner of 345 Lafayette street. Associate hostesses were Mrs. S. K. Hardy and Mrs. John A. Dodd. Mrs. G. Williamson of Toledo, sister of Mrs. P. P. Mann, was a guest.

Covers were laid for 35 at a luncheon, which was followed by the business session. It was decided to purchase a vacuum pump and plates for the hospital. A large donation of jelly was made to the hospital.

## Halloween Party Held by C. D. & M. Employees, Guests

**GHOSTS** paraded with Mickey Mouse and the traditional black cats and witches came out into the open last night when the employees of the C. D. & M. Electric company, their wives, families and sweethearts met for a Halloween masquerade party at the company's terminal building on West Center street.

Decorations of pumpkins, corn stalks, hogpuzzles and other seasonal motifs provided a colorful setting for the party. A ruse band entertained with music as the guests were assembling and also played for the grand march, during which Robert Yazel, costumed as a mechanical man, and Gerald Social dressed as a Hula dancer were awarded costume prizes. Motion pictures of Mickey Mouse provided entertainment for the children, and music for dancing was played by Bob McManahan and his orchestra. Refreshments in keeping with the party spirit were served to 150 employees and their guests during the evening.

H. H. Kochensperger was general chairman for the party assisted by a general committee composed of Harry Seitz, Howard Taylor and Charles Knachel. The social committee included Frank Baard, Miss Ruth Kleinfelder, Paul Applegett and Archie McVicker, and the entertainment was arranged by Robert Graham, Mrs. William Scherr, Carl Marble, and Larry Larcher.

The party, voted a huge success by the group, promises to become an annual affair.

# Harding To Play Shelby Friday in Final Home Game

## LEAGUE TILT TO BE HELD UNDER LIGHTS; RESERVES TO CLASH

Contest To Leave Only Two More Engagements on Marion Schedule

Harding High Presidents with a record of two victories three defeats and one tie game will make the farewell appearance on the Marion gridiron Friday night when the Shelby Wildcats visit here. The game is a N. C. O. league affair and a victory for the Presidents will give them a better opportunity to take over a first division berth.

The Juniorarsity teams of Harding and Shelby schools will meet in a preliminary to start at 6:15 o'clock. The Marion Jr. varsity will have a non-league encounter with an old rival and the following Saturday will close the season with an N. C. O. game at St. Vernon. The latter team will be engaged in an all-important league tilt at Ashland Saturday, afternoon while the other members of the loop Gallion and Mansfield will travel on the latter part of the week.

League followers will center their attention on the Ashland-Mt. Vernon game. The Yellow Jackets have suffered only one defeat that at the hands of Mansfield 14 to 6 and will face Ashland in a tied undefeated and undefeated team. A victory for Mt. Vernon would hand the Jackets a good possibility of finishing in second place and the outside chance of finishing the conference season in a tie.

Should Ashland win the Hilltopper would invade the list of the Mansfield Tigers Nov. 14 with the possibility of both teams uniting at the N. C. O. championship at St. Ashland's victory would give it a chance at the title and the team could finish no worse than in runner-up position. According to league records of the three games already played the Mansfield Tigers are out in front in the number of points scored. The Tigers have registered

# Powerful Grid Teams of Midwest Preparing for Season's Big Week-End

Marquette, St. Mary To Open Series of Important Games: Minnesota and Northwestern To Clash; Ohio State To Play Notre Dame.

By The Associated Press  
The football season is under way in the Midwest, with the big week-end games of the season being played today. Marquette and St. Mary's are opening their series of important games, while Minnesota and Northwestern are expected to clash in a game of national importance. Ohio State is also expected to play Notre Dame.

Marquette's game with St. Mary's is expected to be a close one, as both teams are well prepared for the contest. Minnesota and Northwestern are also expected to have a hard-fought game, while Ohio State and Notre Dame are expected to have a game of national importance.

During his 23 years on American tracks, Garner "booted home" more than 2,000 winners and earned well over \$2,000,000.

Stricken with a heart attack upon his return home last night from River Downs (formerly Coney Island) track at Cincinnati, Garner was hurried to a hospital where he died.

Members of his family said he complained of suffering from indigestion before he left for the track where he rode Slant Eye to victory in the first race, but failed to place on his succeeding three mounts.

FROM THE CYPRESS CASKS OF GOEBEL

## LET'S TALK ABOUT CYPRESS CASKS!

• You hear a lot of conversation about beer—how one kind is extra-smooth, another has more sparkle, still another tastes "imported". But for downright goodness, for true flavor, you can't beat beer that has been mellowed in Cypress Casks! That's the sort of beer Goebel is: every drop smooth, every drop mellow, every drop sparkling with golden goodness! Order a case of Goebel now. In standard bottles, convenient Steinies and 12-ounce Keglined cans.
